Countdown to the Launch of National Health Center Week 2016 Begins

National Campaign Celebrates Health Centers as Bipartisan Solutions in Healthcare

Events around the country are planned as part of National Health Center Week (NHCW). The national campaign runs August 7-13th with the goal of raising awareness about the mission and accomplishments of America's Health Centers over the course of more than five decades.

One of the bright spots in America's healthcare system, health centers started over 50 years ago as a pilot project during President Lyndon Johnson's [War on Poverty](#). Today, they have compiled a significant record of success that includes:

- Producing \$24 billion in annual health system savings
- Reducing unnecessary hospitalizations and unnecessary visits to the emergency room
- Treating patients for a fraction of the average cost of one emergency room visit
- Maintaining patient satisfaction levels of nearly 100 percent
- Generating \$26.5 billion in economic activity and over 230,000 jobs
- Reducing infant mortality rates

Health centers not only prevent illness and foster wellness in the most challenging populations, they produce innovative solutions to the most pressing healthcare issues in their communities. They reach beyond the walls of conventional medicine to address the factors that may cause sickness, such as lack of nutrition, mental illness, homelessness and addiction. Because of their long record of success in innovation, managing healthcare costs, and reducing chronic disease, leaders in Congress have declared health centers a model of care that offers a "bipartisan solution to the primary care access problems" facing our nation.

Visit Clinicas de Salud del Pueblo from August 8-12 for a free tour of your local community health center. Clinicas has twelve health centers to serve you in Imperial and Riverside counties.
